JARACON

EPC PROJECTS

ABOUT US

JARACON EPC PROJECTS Trading Contracting & Services, is a leading contracting company specializing in end-to-end construction solutions.

From excavation to the final finish and handover, we are committed to delivering excellence in every stage of building development.

With a strong foundation built on trust, innovation, and quality, JARACON EPC PROJECTS has quickly positioned itself as a reliable partner in the construction sector.
Our expertise spans across the construction of residential, commercial, and power plant projects, ensuring diverse capabilities to meet the growing demands of clients across multiple industries.
Under the visionary leadership of our founder, Ankit Jhajhria,

MISSION AND VISION

MISSION

Our mission is to deliver high-quality, sustainable construction solutions from excavation to handover, ensuring client satisfaction through innovation, safety, timely delivery, and excellence across residential, commercial, and power projects.

VISION

Our vision is to be a globally recognized EPC leader, driving innovation in construction, empowering communities with sustainable infrastructure, and creating long-term value for clients, partners, and future generations.

HIGHLIGHTS

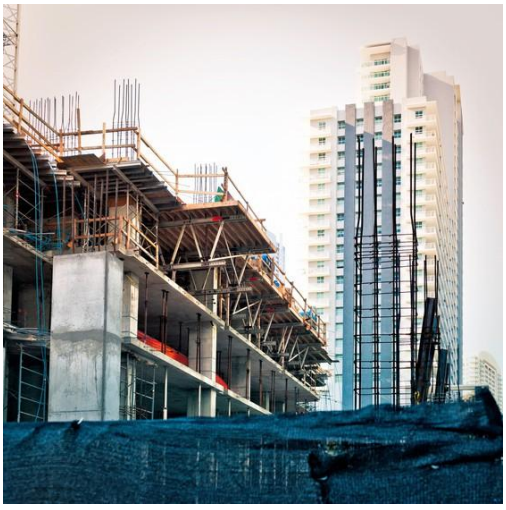
JARACON EPC PROJECTS trading contracting & services, is a dynamic contracting company specializing in complete construction solutions. From excavation to final handover, we provide world-class services with precision, safety, and quality. Our expertise covers residential, commercial, and power plant projects, supported by strong partnerships with leading global clients such as Sinohydro Corporation,PowerChina Guizhou Engineering Co. Ltd, Gulf Contracting Company WLL, and HBK Engineering Services. With ongoing projects like the 800MW Solar Power Project at Al Kharsaa and 500MW Picking Unit Project at Ras Bu Fantas, we focus on innovation, sustainability, and timely project delivery.

SUCCESS MANTRA

At JARACON EPC PROJECTS trading contracting & services, our success mantra lies in a strong commitment to quality, integrity, and innovation. We believe that every project is an opportunity to create lasting value by combining advanced technology, skilled expertise, and sustainable practices. Our team prioritizes safety, timely execution, and client satisfaction at every stage of construction. With clear vision,

collaborative partnerships, and unwavering dedication, we ensure excellence from excavation to handover. By staying adaptable to industry advancements and maintaining transparent relationships, we transform challenges into opportunities, driving long-term growth and setting new benchmarks in the construction industry.

OUR PRINCIPLE



- Ethical Business
- Decision Making
- Risk Management
- Respect human rights

CORE VALUE

INTEGRITY

COMMITMENT TO CUSTOMERS

WHY CHOOSE US

Choosing JARACON EPC PROJECTS trading contracting & services means partnering with a company dedicated to delivering excellence in every detail. We provide end-to-end construction solutions, ensuring precision from excavation to handover.

Our strength lies in highly skilled professionals, advanced technology, and strict adherence to safety and quality standards. With successful collaborations with global leaders like Sinohydro Corporation, PowerChina, and Gulf Contracting Company WLL, we have earned a reputation for reliability and trust.

Our ongoing landmark projects, including the 800MW Solar Power Project, showcase our capabilities. We are committed to innovation, sustainability, and timely delivery, making us the preferred construction partner.

SERVICES

ANTI-TERMITE TREATMENT

Our anti-termite treatment ensures complete protection of structures from termite infestations, safeguarding foundations and interiors. Using advanced chemical solutions and eco-friendly practices, we create a strong protective barrier that prevents damage, increases structural longevity, and ensures a safe environment for residential, commercial, and industrial buildings.

WATERPROOFING WORKS

We deliver reliable waterproofing solutions that protect structures from water seepage and moisture damage. Our expertise covers roofs, basements, foundations, and concrete structures, ensuring durability and strength. With advanced techniques and premium materials, we provide long-term protection against leaks, cracks, and weather elements for sustainable construction.

REBARS

We specialize in supplying and fixing reinforcement bars (rebars) that form the backbone of strong, durable concrete structures. Our precision-engineered rebars enhance structural strength, stability, and performance, meeting international standards. With skilled expertise and quality materials, we ensure reliability in complex residential, commercial, and power plant projects.

FORMWORK

Our formwork services provide temporary molds that shape concrete into strong, precise structures. Using advanced systems and durable materials, we ensure accuracy, safety, and quality in construction. From foundations to superstructures, our efficient formwork solutions guarantee timely delivery and cost-effectiveness across various building and infrastructure projects.

CONCRETE

We deliver high-performance concrete solutions tailored to structural requirements. With advanced mixing, placement, and curing techniques, our concrete ensures strength, durability, and stability. Whether for foundations, slabs, columns, or industrial applications, we maintain strict quality control to achieve excellence in construction and long-lasting structural performance.

FLOORING WORKS

Our flooring works include installation of durable and aesthetically pleasing finishes for residential, commercial, and industrial spaces. From concrete flooring to tiles, marble, and specialized finishes, we focus on quality, precision, and long-lasting performance. Each flooring solution is tailored to client needs, ensuring safety, durability, and elegance.

CEILING WORKS

We deliver high-standard ceiling works including gypsum, acoustic, and decorative ceilings. With advanced techniques and materials, our ceilings provide strength, insulation, and aesthetic appeal. Designed for both function and appearance, these solutions enhance interiors while offering durability, acoustic performance, and customized finishes to meet unique project requirements.

ROAD WORKS

Our road construction expertise includes highways, internal roads, and access infrastructure. With advanced machinery, durable materials, and skilled workforce, we deliver smooth, long-lasting, and safe road networks. Our services ensure quality, precision, and sustainability, supporting urban development and industrial projects with reliable transportation routes and infrastructure connectivity.

RESIDENTIAL BUILDINGS

We provide end-to-end residential construction solutions, including villas, apartments, and housing complexes. From foundation to finishing, our process emphasizes safety, quality, and modern design. Combining functionality and aesthetics, we deliver comfortable, sustainable living spaces tailored to meet the needs and aspirations of homeowners and developers alike.

COMMERCIAL BUILDINGS

Our commercial construction covers office complexes, retail outlets, malls, and industrial facilities. With a focus on robust design, functionality, and efficiency, we provide state-of-the-art solutions for modern business environments. Our expertise ensures timely execution and premium finishes that meet international standards, supporting productivity and commercial growth.

POWER PLANTS

We bring expertise in constructing large-scale power plants, including solar, thermal, and industrial energy projects. With advanced engineering, safety practices, and high-quality materials, we deliver efficient power infrastructure. Our projects empower communities, support industries, and contribute to sustainable energy solutions, meeting the future energy demands responsibly.

SUBSTATIONS

Our substation construction services include civil, structural, and electrical works to support power distribution networks. With precision engineering and quality execution, we build reliable substations essential for uninterrupted electricity transmission. Our expertise ensures compliance, durability, and efficiency, strengthening energy infrastructure for urban, commercial, and industrial requirements.

Projects

800MW Solar Power Project at Al Kharsaa (Ongoing)
A landmark renewable energy project focused on sustainable solar power generation, contributing 800MW to the grid. JARACON EPC PROJECTS ensures precision engineering, quality construction, and timely execution of this mega green initiative.

500MW Picking Unit Project at Ras Bu Fantas (Ongoing)
This large-scale industrial project delivers 500MW with advanced infrastructure. Our team provides complete construction solutions, ensuring safety, efficiency, and durability to support the region's growing demand for reliable power generation facilities.

Samsung Facility – E IWPP (Start Soon)
An upcoming Independent Water and Power Plant project, combining advanced utilities for energy and water supply. JARACON EPC PROJECTS is committed to building sustainable, world-class infrastructure meeting international safety and quality standards.
